

UX/Web Designer – Krasnodar, Russia

Description

UX/Web designers are the user-understanders in the software development process. They form the interface between the user and the development team. We're looking for a right fit who can buy into our brands, understand our readers, and optimize our web presences. Working with social media and published media, you'll make sure we convey a consistent image.

Responsibilities

You will independently develop our VPNTESER brand presence by collaborating with our development team, social media team and other departments.

Qualifications

Experience with

- Web design
- UX processes
- Social media
- Creation of graphics and markups

Russian and English are required.

- Involvement in video productions

Job Benefits

We offer a relaxed working environment in a modern company. For us, it is not the punctual presence in the office at certain times that counts, but that our colleagues can pursue their tasks creatively and also self-determined. We offer a good salary (official only) and a pleasant working environment. In addition, we support our colleagues through further training and also stays abroad to gain experience.
